Preparation/Consent for TRUS Prostate Biopsy

Name: _____

Date: _____

You are having an ultrasound guided prostate biopsy, for suspicion of prostate cancer. We have discussed the risks, benefits, indications and options at length; and now you are ready to proceed. Clear risks of bleeding infection and pain have been reviewed and discussed. To safely proceed, you must do the following:

- Antibiotics: _____
- Beginning one day prior to biopsy Light diet the day and night prior to biopsy , then only clear liquids day of biopsy,
- GI Prep:
 1. Miralax day before Biopsy, repeat until clear BM (watery)
 2. Or
 3. Fleets enema morning of Biopsy
- Optional medication: AVODART 0.5 mg orally each night, if prescribed
-
- Stop all Aspirin, Coumadin, Plavix, Eliquis, Motrin, Blood thinners or non-steroidals for 10 days prior to biopsy.
 1. Check with your internist/cardiologist to see if safe to stop.
- Consider having someone drive you home, from biopsy, if possible, or wait in lobby for 1-2 hours afterwards.
-
- Expect Blood in Urine, Semen, and Stool for a few days or even weeks.
- Afterwards, Call if Fever is greater that 101 degrees or if you are unable to urinate after biopsy.
-
